SUMMERY

Software engineer with **4+ years** of experience, focusing on **DevOps** and **SRE**.

PROFESSIONAL EXPERIENCE

Site Reliability Engineer — Nov 2025 - Present

SnappPay! | *snapppay.ir*

- **Established** the **SRE foundation** for a rapidly growing organization, introducing standardized **observability**, **alerting**, **dashboards**, and reliability practices from the ground up.
- Drove the adoption of SRE and observability practices in collaboration with engineering teams, **laying the groundwork** for defining **SLIs, SLOs, and SLAs** and improving reliability through data-driven monitoring.
- **Defined** organization-wide **standards** for **metrics and logs**, establishing the first standardized **Prometheus**, **Grafana**, and **centralized logging** setup across projects.
- **Maintained** and improved CI/CD infrastructure for **40+ projects**, working across **Kubernetes**, **Argo CD**, **Nexus**, and **CI/CD** pipelines to improve deployment reliability and operational efficiency.
- **Established** a baseline **documentation culture**, working with teams to improve service ownership, knowledge sharing, and operational troubleshooting.
- **Collaborated** with development teams to **identify** operational and **reliability gaps**, then researched, designed, and developed **internal tools and applications** to address needs not covered by existing solutions.
- Continuously **researched new technologies** and engineering practices, translating relevant findings into practical improvements across the SRE and engineering ecosystem.

DevOps/Backend Engineer — Nov 2024 - Nov 2025

Garno Pragas | *gapcom.ir*

- Designed Git branching strategies and GitLab CI/CD pipelines with automated semantic versioning and Nexus artifact management.
- Containerized applications including Django, Next.js, and Spring Boot; managed NGINX, Linux VMs, and databases across production environments.
- Implemented Prometheus, Grafana, and Loki for infrastructure and application monitoring and logging.
- Automated infrastructure and operational tasks using Ansible, Python, and Bash, including database migrations and backup workflows.
- Developed Spring Boot and Django REST APIs for internal monitoring and file-management systems.
- Contributed to security hardening and compliance, including NGINX, database, Linux firewall, and Afta certification requirements.

FullStack Developer | Djnago/React — May 2024 - Nov 2024

Amatis Dana Tech

- Developed backend services using **Django** and **REST APIs**.
- Applied **SQL**, database design, **normalization**, and **data modeling** best practices.
- Built frontend applications using **React** and delivered full-stack projects. **(parsa-sa.com)**.

Robotics Instructor — Feb 2022 - Mar 2024

Raymand Robot

Taught **Python** and **Arduino** fundamentals to **200+ students**; covered core programming concepts and best practices.

EDUCATION

B. S. Computer Engineering — Feb 2024 - Present

Islamic Azad University, Karaj

B. S. Mathematics — Sep 2022 - Jan 2024

K. N. Toosi University of Technology, Tehran
